

Go2ten Technology

The I.T. standards that are utilised by Go2ten.

We work with the I.T. infrastructure you already have in place and extend it with industry standard technologies.

Databases

Most database engines are supported by our generic development approach.

Java

A programming language for all platforms.

Operating Systems

Windows, Unix, Linux, Macintosh. We have experience in them all.

Web Browsers

Internet based applications can be designed to run on one or a range of browsers.

XML

Delivering and exchanging data in a flexible industry standard format.

about us

Go2ten is an expert software development founded in London in 1998 with three core beliefs.

- Delivering functionality, not playing with technology
- Software development is a process not a product
- Thinking one step ahead with technology and user requirements

Reliable, cost effective and flexible systems are delivered utilising our modular components. Close working relationships with our clients ensure high quality end product.

Our experience in a wide range of industries including advertising, banking, PR and the public sector helps us find the unique solution for each individual client. There is an industry standard solution to your I.T. situation.
